Projects

AMS(Attendance Management System)

- Attendance Management System.
- Developed an advanced attendance management system using React, Django, and MySQL for seamless monitoring and reporting.
- Designed and implemented an intuitive user authentication system, ensuring secure access to attendance data for students and faculty.
- Created a desired section for downloading the attendance reports depending on which faculty is downloading the reports.
- Provided users with instant insight into attendance records and history.

(May 23 - Aug 23)
Team size-2

- Designed a well structured Database for the admin panel for a seamlessly easy experience of the admin.

Tools

- A Flask based website to give users a collection of online available tools.
- The site has 3 sections according to the User's need like Image section, video section and a dedicated section for AI Tools.
- Tech Stack Used: Flask, Python, HTML, CSS.

Position of Responsibility

- Front-end, Back-end, UI-Designer, Database Designer in AMS.
- Events Head of Rekkt society MSI/MSIT.

Interests and Hobbies

- Interest in working with Databases.
- My hobbies include Gaming, Music and Team Contributions.

Declaration: The above information is correct to the best of my knowledge.
